Note to teachers and students on the marking schemes for the deferred examinations

Marking schemes published by the State Examinations Commission are not intended to be standalone documents. They are an essential resource for examiners who receive training in the correct interpretation and application of the scheme. However, it should be noted that the marking schemes for the deferred examinations may not necessarily be as detailed as the corresponding marking schemes for the main sitting of an examination, which serve to ensure consistency across a large team of examiners.

Marking schemes are working documents. While a draft marking scheme is prepared in advance of the examination, the scheme is not finalised until examiners have applied it to candidates' work and the feedback from examiners has been collated and considered in light of the full range of responses of candidates, the overall level of difficulty of the examination, and the need to maintain consistency in standards between the main sitting and the deferred sitting and from year to year. In the case of the deferred examinations, this means that the level of detail may vary by question, as the marking scheme will only have been finalised for the questions attempted by the candidates who sat these examinations.

In the case of marking schemes that include model solutions or answers, it should be noted that these are not intended to be exhaustive. Variations and alternatives may also be acceptable. Examiners must consider all answers on their merits, and will have consulted with a senior examiner when in doubt.

Future Marking Schemes

Assumptions about future marking schemes on the basis of past schemes (whether for the main examinations or the deferred examinations) should be avoided. While the underlying assessment principles remain the same, the details of the marking of a particular type of question may change in the context of the contribution of that question to the overall examination concerned. Accordingly, aspects of the structure, detail and application of the marking scheme for a particular examination will not necessarily be the same for the deferred sitting as for the main sitting or from one year to the next.

CRITERIA FOR ASSESSMENT
The tasks set for candidates in both Paper 1 and Paper 2 will be assessed in accordance with the following criteria:

- Clarity of Purpose **(P)** 30% of the marks available for the task
- Coherence of Delivery **(C)** 30% of the marks available for the task
- Efficiency of Language Use **(L)** 30% of the marks available for the task
- Accuracy of Mechanics **(M)** 10% of the marks available for the task

Each answer will be in the form of a response to a specific task, requiring candidates

- To display a clear and purposeful engagement with the set task
- To sustain the response in an appropriate manner over the entire answer
- To manage and control language appropriate to the task
- To display levels of accuracy in spelling and grammar appropriate to the required/chosen register.

Schematised detail regarding these criteria is to be found in Appendix 1 of this Marking Scheme.

The Grade Grid utilised for purposes of applying the criteria for assessment throughout the marking is to be found in Appendix 2 of the Marking Scheme.

Where discrete criteria awarding is in operation, marks will be indicated on candidates' scripts in the order in which they are set out above.

Given the primacy of Clarity of Purpose (P), marks awarded for either Coherence of Delivery (C) or Efficiency of Language Use (L) cannot exceed the marks awarded for Clarity of Purpose.

Use of Codes, etc.
To assist with forming a judgement, it will be necessary to place an accurate tick at the points identified in the answer, underline all errors in candidates' work and use the proper shorthand codes as indicated throughout the marking scheme.

Use of the full range of marks available
Examiners should make themselves familiar with the range of marks available for each of the tasks set and utilise the full range of marks as appropriate in the course of the marking.

The list of texts prescribed for assessment in 2022 is set out in DES Circular **0002/2020**.

Assessment will proceed in accordance with the State Examinations Commission booklet, *Instructions to Examiners.*

Candidates' work is marked using the criteria for assessment. The indicative material included in the marking scheme is provided to aid examiners and is intended to broadly indicate the type of responses candidates might offer. The indicative material is not exhaustive and all appropriate valid answers should be marked according to their merits, using the criteria for assessment.

If you require any clarification on any of the above, or any other matter, please contact your Advising Examiner.

REASONABLE ACCOMMODATIONS

Candidates presenting for examination with the aid of a scribe or a recording device or a spell-check enabled word processor and other candidates who have been granted an exemption in accordance with the State Examination Commission's RACE manual will have all parts of their examination in English assessed except spelling and written punctuation elements.

In assessing the work of these candidates, a modified marking scheme will apply as follows:

Clarity of Purpose	30% (to be assessed)
Coherence of delivery	30% (to be assessed)
Efficiency of Language (including grammar)	30% (to be assessed)
Spelling and Written Punctuation	10% (not to be assessed)

In using Discrete Criteria, consult the Assessment Grade Grid (Appendix 2) and apply the first three criteria.

Single Text marks, for example, will be applied by awarding marks for PCL:

21 **P** 19
21 **C** 16
21 **L** 17
52

This means, in effect, that these candidates will be assessed in all questions out of 90% of the marks available for the question.

Marks awarded for each question on Paper 1 and Paper 2 will be transferred to the script cover grid of each paper and totalled. As these totals were arrived at on the basis of a 90% application of the available marks, a mark that can be converted into a grade is arrived at by dividing the total for each paper by 9, and adding these marks to the original total in order to achieve a grand total for that paper.

Example:

Total for Paper 1	=	115
Divide by 9	=	12
Grand Total	=	127

Fractions of marks are to be **rounded down** to the nearest whole mark.

In using Combined Criteria, the following will apply:

Questions valued at 40 marks are assessed out of 36 marks
Questions valued at 30 marks are assessed out of 27 marks

Questions valued at 20 marks are assessed out of 18 marks
Questions valued at 10 marks are assessed out of 9 marks
Combined Criteria - Grade Grid

	H1	H2	H3	H4	H5	H6	H7	H8
36 marks	36 - 33	29	26	22	18	15	11	10 - 0
27 marks	27 - 25	22	19	17	14	11	9	8 - 0
18 marks	18 - 17	15	13	11	9	8	6	5 - 0
9 marks	9	8	7	6	5	4	3	2 - 0

MISREADING OF INSTRUCTIONS RELATING TO QUESTION CHOICE

CANDIDATE ANSWERS MORE THAN THE REQUIRED NUMBER OF QUESTIONS

- Mark all the attempts.
- The highest marks will automatically be awarded

INCORRECT/INVALID USE OF SINGLE TEXT/UNPRESCRIBED TEXT/INCORRECT COMBINATION OF TEXTS IN COMPARATIVE STUDY

- **Mark the Comparative answer as per the Marking Scheme.**
- Where the number of texts in a global (70 mark) answer is **two** deduct **half** of the mark awarded.
- Where the number of texts in a global (70 mark) answer is **three** deduct **one third** of the mark awarded.
- If a text is incorrectly used in either part (a) or (b) of a two-part answer, deduct the appropriate fraction of the mark awarded.
- In the unlikely event that the fraction of marks to be deducted from the Comparative answer is **greater** than the mark already awarded for the Single Text (in cases where candidates have attempted a question in Section I), simply disallow the mark for the Single Text and allow the full, original mark for the Comparative answer to stand.
